To Whom It May Concern:

Indiana Attorney General Steve Carter informs me the FCC is taking comments from the public on proceedings "02-278" Telephone Privacy Law protection. It is my understanding you wish to lower the standards of the state Telephone Privacy Law protection with a national standard act. I write to express my disapproval of such measures. The Indiana Telephone Privacy Law protection works to prevent unwanted telemarketing calls. I want to keep it that way.

I request the FCC to not implement any proposal that would lessen Indiana's Telephone Privacy Law protection.

Our time at home without our evenings and evening meals being pierced by telemarketing has been a blessed peace. Meal times and daily family time used to be interrupted by 5 or 6 calls a week, now we only receive one.

Less Federal government (intervention) in State government is always welcomed, Government 101. Implementing a lower national standard in place of a higher state government standard is the kind of legislating we citizens want less of as well as less telemarketing.

Thank you for your time and consideration to this request. Looking forward to continued peaceful meals and family time without crass soliciting calls.

Sincerely,

A handwritten signature in cursive script that reads "Nina L. Enlow".
